NEW SOUTH WALES
DIGEST OF CURRENT STATISTICS

Page

GENERAL

34

PART I : EMPLOYMENT AND NON-RURAL INDUSTRIES

Employment	April, 1962	34-36
New South Wales Railways	March, 1962	36
Trams and Buses	March, 1962	36
Motor Vehicle Registrations	April, 1962	37
Oversea Migration	Year, 1961	37
Population	Year, 1961	38
Production - Coal & Factories	April, 1962	39
New Building	April, 1962	39

PART II : FINANCE AND TRADE

Banking - General	March, 1962	40
Trading Banks	April, 1962	41
Savings Bank Deposits	March, 1962	41
Prices	March, 1962	42-43
New South Wales Accounts	April, 1962	43
Sydney Stock Exchange	April, 1962	44
Retail Trade, Large Sydney Stores	April, 1962	44
Hire Purchase	April, 1962	44

PART III : RURAL INDUSTRIES

The Season	April, 1962	45
Dairying - Production and Use	March, 1962	45
Wool - Receipts and Price	April, 1962	46

GRAPHS : Economic Indicators

Years 1955-62

47/48

2005

The series listed in this Digest show in general a steady improvement in economic conditions during the first four months of 1962. Employment is rising in factories, building, trade and other service occupations, but there is still some over-supply of labour both for skilled and unskilled positions, including part of the recent influx from school-leavers. In factories, output of basic items, such as steel and power, is at record levels, and production of other goods, though still below earlier peak levels, is generally greater than last year. Motor vehicle registrations have risen strongly, and building activity shows some improvement over 1961 figures. However, retail turnovers show little advance on last year's level, and the proportion of bank deposits going into savings or fixed-deposit accounts continues to rise. After weakening earlier in the current season, the wool price recovered in March and April and remained steady at the closing level of the 1960-61 season.

PART I EMPLOYMENT AND NON-RURAL INDUSTRIES

EMPLOYMENT (See also graph p. 47)

Statistics shown on pages 35 and 36 indicate that the recovery in the employment position evident in March quarter 1962 slowed down in April.

Civilian employment (excluding defence forces, rural workers and women domestics) in New South Wales rose by 2,300 in February and 5,300 in March to a total of 1,203,400. Engagement of juniors usually boosts employment at this time of year, and whilst this effect in 1961 was overshadowed by the general contraction and employment fell by 7000 in the two months, the increase in the corresponding period of 1960 had been 13,500, or about the same as in 1962. The principal increases in employment during March 1962 were recorded in factories (2200), building (1300) and trade (1300); however, employment in factories and transport still remained below the level of March 1961. Over the year ended March, 1962, total employment rose by 0.6 percent., a rise of 4.6 percent. in Government compensating for a fall of 0.7 percent. in private employment. As in the three preceding years, the increase was relatively greater for female than for male employment, and female as a proportion of total employment increased from 28.0 percent. in March 1958 and 28.6 percent. in 1960 to 28.8 percent. in 1962.

CIVIL EMPLOYMENT	NEW SOUTH WALES					AUSTRALIA

Employment in Australia increased by 25,200 in February and 16,000 in March 1962 to a total of 3,080,500; this total was 0.4 percent. more than in March 1961, as against increases of 1.1 and 3.4 percent. in the two preceding years.

An employment survey of larger privately-owned factories in New South Wales showed a fall of 10 percent. between November 1960 and August 1961 with a subsequent recovery of 6 percent. to a total of 233,800 in March 1962. There was virtually no change in April when a seasonal fall of 900 in the canning industries was offset by slightly increased employment in the basic metal, motor, and electrical appliance industries.

The downward trend of recent months in the number of Unplaced Applicants for employment (registered with Commonwealth Employment Service Offices) in New South Wales eased with falls of 6100 in February, 4300 in March and 900 in April 1962 to a total of 35,800. The decline in April was confined to the metropolitan area where labour demand increased for factories and works projects; and where the number of male applicants (11,700) is now less than in April 1961 (14,300) though still nearly three times as high as two years ago. The number of male applicants outside the metropolitan area (10,500) and of all female applicants (13,600) remains substantially higher than last year. Juniors (under the age of 21) made up 22 percent. of male and 46 percent. of female applicants at the end of April 1962.

The number of persons on Unemployment Benefit which had fallen from a peak of 24,100 in August 1961 to 16,600 in March 1962 rose by about 1000 to 17,600 in April; half of this increase was in the Sydney area, where the total is now 9000. Temporary lay-offs before the Easter holidays might have been a factor in this reversal.

An occupational analysis of unplaced applicants shows a large proportion in the skilled and semi-skilled groups which would include juniors seeking entrance into these trades.

New South Wales, 27 th April, 1962	M a l e s		F e m a l e s	
	Unplaced Applicants	Unfilled Vacancies	Unplaced Applicants	Unfilled Vacancies
Rural	1,400	200
Professional, Commercial, Clerical	2,200	700	5,600	1,600
Skilled Building & Construction	1,000	300
Skilled Metal & Electrical	1,000	900
Other Manual Skilled & Semi-skilled	7,500	1,100	4,000	1,200
Unskilled Manual	6,800	1,000
All Other Occupations	2,300	300	4,000	900
T o t a l	22,200	4,500	13,600	3,700

In Australia the number of Unplaced Applicants for employment fell in April 1962 in all States except Victoria and South Australia where seasonal dismissals occurred. The overall decrease of 2,600 to 98,500 was less than in March (11,200) or February (19,200) of this year and about the same as in April 1960 when the total had fallen by 2,700 to 51,500; in April, 1961 the number of applicants had risen by 7,600 to 89,400. The fall in April, 1962 was confined to juniors, who however, still constituted a third of the total at the end of the month. The number of persons on Unemployment Benefit rose in all States, except Queensland, and the total of 49,100 at the end of April was 3,200 greater than in March but less than in the three preceding months when it had exceeded 50,000.

COMM. EMPLOYMENT SERVICE UNPLACED APPLICANTS

	N.S.W.	Victoria	Qld.	South A.	West A.	Tasmania	Total
1960, 1st April	18,400	11,700	12,900	4,100	5,000	2,100	54,200
29th April	17,500	11,600	11,400	4,500	4,600	1,900	51,500
28th October	11,600	7,500	7,100	3,300	3,300	1,600	34,400

NEW SOUTH WALES GOVERNMENT RAILWAYS AND TRAM & BUS SERVICES

The volume of goods traffic on the State railways in the nine months ended March, 1962 was the same as in this period of 1960-61 but passenger traffic was a little less. Gross earnings fell by £2.1m. while working expenses rose by £1.6m. reducing the surplus on working account for the nine months from £10m. in 1960-61 to £6.3m. in 1961-62.

NEW SOUTH WALES GOVERNMENT RAILWAYS		Nine Months ended March			Month of March		
		1960	1961	1962	1960	1961	1962
Passenger Journeys	million	190.0	190.2	189.1	21.8	21.1	21.4
Goods(excl. Livestock)	million tons	15.89	17.73	17.73	1.97	2.18	2.00
Gross Earnings	£million	61.55	57.35	55.26	7.69	7.75	7.35
Working Expenses	£million	54.60	57.40	58.97	6.43	6.58	6.47
Excess, Gross Earnings	£million	6.95	9.95	6.29	1.26	1.17	0.88

A small reduction in working expenses of the Government bus services in July-March from £10.39m. in 1960-61 to £10.2m. in 1961-62 offset the fall in earnings from £9.54m. to £9.39m., and the deficit on working account was reduced by £40,000 to £812,000. An increase in bus mileage in the Sydney area reflects the gradual replacement of trams which was completed in February, 1961.

GOVERNMENT TRAMS AND BUSES - Working Account

Nine Months Ended March	Gross Earnings	Working Expenses	Excess of Earnings(+) or Expenses(-)			Bus Miles	
	Sydney & Newcastle	Sydney & Newcastle	Sydney	Newcastle	Total	Sydney	Newcastle

MOTOR VEHICLES - New South Wales & Australia (See also graph p.48)

Registrations of new motor vehicles recovered early in 1962 when sales tax was reduced. The New South Wales total for January-April of 35,600 in 1962 (90,200 in Australia) was 5,400 or 18 percent. greater than in 1961 (14,400 or 19 percent. greater in Australia) and close to the 1960 figures.

REGISTRATION OF NEW MOTOR VEHICLES(Exc.Motor Cycles)	New South Wales			Australia		
	1959/60	1960/61	1961/62	1959/60	1960/61	1961/62
September Quarter	27,000	31,500	22,300	69,200	83,000	56,900
December Quarter	30,000	31,400	25,200	80,500	84,000	65,600
March Quarter	26,400	22,500	27,400	68,500	58,900	68,100
April	8,200	7,700	8,200	23,000	18,900	22,100

OVERSEA MIGRATION - Australia

Statistics of overseas migration, available as from 1959, show arrivals and departures according to stated purpose of travel, as follows: Permanent covers arrivals of "Settlers" (person in stating they intended to settle in Australia) and departures of "Former Settlers" (persons stating on departure that they came intending to settle and had stayed for one year or longer; if such persons had stayed less than one year they are grouped with Visitors departing under Short-term movement). Long-Term relates to Australian residents travelling abroad (or overseas visitors staying in Australia) for periods of one year or more. And Short-Term to travellers and visitors for periods less than one year, together with Australian troop movements irrespective of length of absence. The statistics do not include ships' and air-crews.

In 1961 short-term arrivals of 185,500 and departures of 192,400 were appreciably higher than in 1960 (159,800 and 162,500), with increase for both Australian residents as well as visitors. Similarly, long-term (other than permanent) arrivals (32,200) and departures (44,400) rose. The combined balance of the non-permanent movements showed an excess of departures of 19,100 in 1961, as compared with 9,100 in 1960 and 8,100 in 1959.

In the permanent movement arrivals of settlers declined from 97,800 in 1959 and 110,100 in 1960 to 95,400 in 1961, there was a small rise in 1961 in departures and the net gain from permanent migration (of settlers and other residents) fell from 84,900 and 99,200 to 80,600 in the respective years. Out of the 95,400 settlers arriving in 1961, 46,400 (49 percent) were of British nationality, and the balance included 16,500 Italians, 7,800 Greeks, 5,100 Germans and 5,000 Dutch. In permanent departures the proportion of British subjects was higher, and the net permanent movement into Australia of 80,600 included 34,800, or 43 percent, British subjects. Age groups of arriving settlers in 1961 were as follows: 26,900 or 28% aged under 15, 66,600 or 70% aged 19 to 64, and 1,900 or 2% aged 65 and over. A little over one half of arriving settlers were males, and in the balance of the permanent & long-term movement there was about an even number of males and females; however, with an excess of males in the short-term departures, the overall balance of all overseas migration in 1961 (unlike 1960 or 1959) showed a greater net gain of females (32,500) than of males (29,000).

See first par. above for definition of terms.

The estimated population of New South Wales was 3,953,600 at 31st December 1961, representing an increase in the year of 76,400 or 1.97 per cent. Percentage increases in the other States were a little over 2 per cent. (except Queensland 1.33%), and the rise in the Australian population in 1961 totalled 212,000 (101,500 males and 110,500 females), equivalent to 2.04 per cent. This rate was a little less than in recent years (2.27% in 1960) because of reduced migration.

New South Wales' share of the Australian total fell from 39.3 percent. in 1947 to 37.3 percent. in 1959 but remained at that figure in 1960 and 1961.

End of December	TOTAL POPULATION - Thousand Persons PERCENT. OF AUSTRALIAN POPULATION									
	1947	1957	1959	1960	1961	1933	1947	1959	1960	1961

In New South Wales, a record number of births (86,400), combined with an unchanged number of deaths (35,000), raised the natural increase in the population in 1961 to 51,400 as against 47,000 in 1960). The birth rate per 1000 of mean population rose from about 21½ in 1959 and 1960 to 21.9 in 1961, the highest since 1957, but, as in every year since 1950 it remained lower than in the other States. The rate for Australia rose from 22.4 in 1960 to 22.9 in 1961. The New South Wales rate for deaths fell from 9.1 per 1000 in 1960 to 8.9 in 1961; since 1954 it has been the highest for any State (Australia 8.5 in 1961).

The net population gain from migration in New South Wales declined from 36,200 in 1960 to 25,000 in 1961. It fell also in most of the other States (in Victoria from 37,400 to 20,200), and the Australian total of 61,000 was about one third less than in 1960 (89,000) and was the smallest since 1953. Migration accounted for 29 percent. of Australia's population gain in 1961, as compared with 39 percent. in 1960 and 36 percent. in 1959.

NEW BUILDING APPROVED - New South Wales (See also graph p. 48)

After declining throughout 1961 and January/February 1962, the number of new dwellings approved in New South Wales showed signs of recovery in March, and at about 3200 in April approvals were the highest for any month since 1960. The rise in April was largely due to the particularly large number of Government projects started (about 500 each of houses and flats), whilst approvals for private dwellings (2178) were less than in March. For the four months ended April, approvals of 10,287 in 1962 were a little higher than in 1961 (10,129) but 25 percent. less than exceptional levels of 1960. The value of approvals of new dwellings at £37m. in the 1962 period was £2m. more than in 1961 (£6m. less than in 1960). Approvals for new factory buildings have been lagging but for offices and 'other' building (schools etc.) they were comparatively high.

P R O D U C T I O N - New South Wales (See also graph p. 48)

Allowing for seasonal factors, production in New South Wales of coal, power, iron, steel and synthetic resins continued to expand in the first four months of 1962, and production of motor bodies, electric motors, batteries and washing machines was also relatively high. With the exception of bricks and cement (and on March quarter figures also roof tiles, fibrous plaster and clothing items) production of other major items shown (building fittings, engines, radios, TV sets, yarn, cloth) in March quarter and April 1962 also compared favourably with 1961, although they were generally not quite back to the level of 1960. In the food industries production was relatively high in 1962 for dairy and canning products and near last year's level for flour and beer.

BANKING - General - Australia

The Australian volume of money (defined as holdings by the public of notes and coin plus deposits with trading and savings bank) increased by £80m. to £3957m. between December and March 1961/62, whereas last year it remained at £3701m. in both months. Between March of 1961 and 1962 there was an increase of £256m. or 6.9 percent., which was the largest annual increment for about eighteen months; this increase occurred mainly in fixed deposits with the trading banks (up £119m. or 29 percent.) and savings deposits (up £112m. or 7 percent.). In the more active portions of the money supply, current bank deposits rose by only £27m. or 2 percent. (which still left them £67m. lower than in March 1960) and the note and coin issue fell by £2m. over the year.

Excluding Government and inter-bank deposits.

International reserves, which had fallen from £547m. in March 1960 to £388m. in March 1961, recovered to £538m. in March 1962 (this excludes loan from International Monetary Fund of £78m. which was raised in May 1961 and repaid in March 1962). There was little change in total bank advances between March 1961 (£1436m.) and 1962 (£1441m.), with a rise in savings bank loans offsetting a decline in trading bank lending. Following the recovery in international reserves, the Reserve Bank reduced its holdings of Government bonds by £191m. between March 1961 and 1962, but portfolio of the trading banks nearly doubled during the year (signifying the swing from tight to abundant liquidity) and the savings banks continued to add to their holdings; total holding by all banks increased by £118m. or 6 percent. to £2121m.

1. LINE

Deposits with major trading banks in Australia fell seasonally in April 1962 by £12m. to £1883m., corresponding to a similar fall in April 1961 when the total stood at £1758m. Current deposits at £1320m. were £17m. more than in April 1961 but still £75m. below the level of April 1960 when the preceding seasonal upswing had been greater (£154m. in August/March 1959/60 as against £126m. in 1961/2.) There has been a continuous rise in fixed deposits since interest rates were raised in November 1960, and the total of £563m. in April 1962 was equivalent to 30 percent. of total deposits as against 26 percent. in 1961 and 22 percent. in 1960.

After a comparatively heavy reduction from £1035m. in July 1961 to £965m. in February 1962, bank advances increased by £43m. in March/April to £1009m. At this time of 1961 there was a general contraction in lending but in March/April 1960 there had also been a seasonal rise of £43m., the ratio of advances to deposits of 53.6 percent. for April 1962 remained comparatively low. Seasonal demands on the banks in April 1962 were met partly by a release of £11m. from the Statutory Reserve Deposits (reducing their ratio to customers' deposits to 11.9 percent., the lowest since the war), and partly by a reduction in securities and other liquid assets (which however left their ratio to deposits at 27.8 percent., much higher than at this time of recent years).

SAVINGS BANK DEPOSITS - New South Wales and Australia

Savings bank deposits in New South Wales rose by £6.5m. in March quarter 1962 to a total of £600.8m., as compared with a fall of £3.3m. in this quarter of 1961 and an increase of £8.6m. in March quarter 1960. After a decline in the first half of 1961 savings bank deposits have risen steadily, and in March 1962 were £40m. of 7.1 percent. higher than a year earlier.

Savings bank deposits in Australia at the end of March 1962 totalled £1670.1m., or 7.6 percent. more than a year earlier (increases of 4.2% for Commonwealth Savings Bank, 6.6% for State & Trustee Savings Banks, 18.7% for private savings banks). The rates of increase in the two preceding years were 5 and 9.5 percent. respectively.

Savings deposits in April 1962 fell by £1.6m. to £599.2m. in N.S.W. and by £6.4m. to £1663.7m. in Australia.

1911

Dear Sir,

I have the honor to acknowledge the receipt of your letter of the 11th inst. in relation to the above matter.

I am sorry to hear that you are having trouble with your machine. I will try to get it fixed for you as soon as possible.

Very respectfully,
J. H. Smith

I am sorry to hear that you are having trouble with your machine. I will try to get it fixed for you as soon as possible.

I am sorry to hear that you are having trouble with your machine. I will try to get it fixed for you as soon as possible.

I am sorry to hear that you are having trouble with your machine. I will try to get it fixed for you as soon as possible.

I am sorry to hear that you are having trouble with your machine. I will try to get it fixed for you as soon as possible.

I am sorry to hear that you are having trouble with your machine. I will try to get it fixed for you as soon as possible.

Prices, as measured by major Australian indexes, turned downwards in the second half of 1961; in the March Quarter of 1962 Consumer Price Indexes continued to fall but slight increases were recorded in the Wholesale and Export Price Indexes.

The Consumer Price Index, registering its first falls since 1957, declined by 0.7 percent. between June quarter 1961 and March quarter 1962 and it was then about the same as a year earlier. The component series of the Wholesale Price Index with the exception of textile fibres (mainly wool), were either steady or showed some decline during 1961 and the aggregate index in March quarter 1962 stood 5.8 percent. lower than a year earlier. The Export Price Index rec'dered in March quarter 1962, mainly because of higher wool prices, and was then 2.9 percent. higher than in March quarter 1961. Import prices remained steady during the year.

The decrease of 0.7 percent. in the Consumer Price Index (Six Capitals) between the June quarter of 1961 and March quarter 1962 was due to a fall of 3.6 percent. in the component Food series (in particular in meat and potato prices) which more than offset continuing small rises in the other component groups. Between March quarters 1961 and 1962 the food series fell by 3%, as against a corresponding increase of 7% in the preceding year; the housing series rose by 4% as against 8% in the 1960-1961 period, and the other series rose by about 1% as against 3% in the preceding year. The aggregate index fell slightly between March quarters 1961 and 1962 in each of the Capital cities except Brisbane (up 0.8%).

March 1961	123	126	127	123	122	128	124
March 1962	122	126	128	122	122	128	124

The Australian Wholesale Price Index (1936/7 - 38/9 = 100), declined from a peak of 372 in August 1960 to 330 in November 1961, the lowest point since early in 1959; subsequently a one percent. increase brought it back to 333 in March 1962. The fall in 1960/1 and the subsequent small rise strongly reflect the trend in the Food & Tobacco series which has a weight of over one half in the aggregate index. The Basic Materials group declined more slowly and remained steady in recent months, with increases in the component series for Textiles (mainly wool) being balanced by falls in the Oils and Metals and Coal series. The series for Goods Principally Imported (as included in the index), which had shown little change in 1959 and 1960, has slowly fallen since 1961; the long-term upward trend in prices of Goods Principally Home-Produced (as included in the index) was halted, at least temporarily, with a reduction from 410 in August 1960 to 354 in November 1961, followed by a slight rise to 360 in March 1962.

See table over/...

1. The first part of the report discusses the general situation of the country and the progress of the work in the various departments. It also mentions the results of the recent elections and the state of the economy.

2. The second part of the report deals with the internal affairs of the country, including the administration of justice, the education system, and the health services. It also mentions the progress of the various public works projects.

3. The third part of the report discusses the external affairs of the country, including the relations with the neighboring countries and the international community. It also mentions the progress of the various diplomatic missions.

4. The fourth part of the report discusses the progress of the various public works projects, including the construction of roads, bridges, and railways. It also mentions the progress of the various social welfare projects.

5. The fifth part of the report discusses the progress of the various educational projects, including the construction of schools and the training of teachers. It also mentions the progress of the various research projects.

6. The sixth part of the report discusses the progress of the various health projects, including the construction of hospitals and the training of medical personnel. It also mentions the progress of the various public health campaigns.

7. The seventh part of the report discusses the progress of the various economic projects, including the construction of factories and the training of workers. It also mentions the progress of the various agricultural projects.

8. The eighth part of the report discusses the progress of the various cultural projects, including the construction of museums and the training of artists. It also mentions the progress of the various literary projects.

9. The ninth part of the report discusses the progress of the various sports projects, including the construction of stadiums and the training of athletes. It also mentions the progress of the various sporting events.

Summary of the progress of the various projects	
Project	Progress
Construction of roads	80%
Construction of bridges	75%
Construction of railways	60%
Construction of schools	90%
Construction of hospitals	85%
Construction of factories	70%
Construction of museums	65%
Construction of stadiums	55%
Construction of public works	78%
Construction of social welfare projects	82%
Construction of educational projects	88%
Construction of health projects	86%
Construction of economic projects	72%
Construction of cultural projects	68%
Construction of sports projects	58%

10. The tenth part of the report discusses the progress of the various administrative projects, including the construction of government buildings and the training of civil servants. It also mentions the progress of the various judicial projects.

11. The eleventh part of the report discusses the progress of the various legislative projects, including the drafting of laws and the holding of legislative sessions. It also mentions the progress of the various executive projects.

12. The twelfth part of the report discusses the progress of the various judicial projects, including the holding of court sessions and the rendering of judgments. It also mentions the progress of the various administrative projects.

WHOLESALE PRICE INDEX = Australia - Base 1936/7 to 1938/9 = 100

Month	Basic Materials							Goods mainly			TOTAL ALL GROUPS
	Textile Fibres	Metals & Coal	Oil, Fats, Waxes	Chemicals	Building Materials	Rubber & Hides	Total	Food & Tobacco	Imported	Home Produced	
Aug. 1960	366	401	225	329	439	365	347	392	280	410	372
March 1961	395	397	220	332	438	324	345	367	276	391	357
Nov. 1961	385	393	211	333	439	297	339	322	272	354	330
March 1962	411	390	211	334	439	297	340	328	269	360	333

Fluctuations in the wool price (which has a weight of 46% in the aggregate index) were a major factor in the fall in the Export Price Index from 371 in April 1961 to 348 in November, with a subsequent recovery to 367 in March 1962; corresponding movements in the component Wool series were 430, 392 and 422. The index series excluding wool remained fairly steady at 321, 312 and 321 in this period, with higher prices for wheat, butter and hides compensating for falls in metals, meats, dried fruits, sugar and tallow. An index using actual export quantities as weights shows that comparing July-March 1961 and 1962 export prices including wool rose by 4 percent while those excluding wool remained unchanged.

EXPORT PRICE INDEX - Australia - Base 1936/7 to 1938/9 = 100

x Series for Gold, at 178 throughout period, also included in aggregates.

Import Prices (Reserve Bank Index) remained virtually unchanged in 1961 and the first quarter of 1962, so that the Terms of Trade (ratio of export to import prices) which had declined by about $7\frac{1}{2}$ percent. in the twelve months ended June 1961 improved by $1\frac{1}{2}$ percent. in the nine months ended March 1962.

NEW SOUTH WALES GOVERNMENT ACCOUNTS

In the ten months ended April, Governmental revenue in 1961-62 totalled £140.8m. or £10.4m. more than in 1960-61. Main increases were in Commonwealth General Grant (£6.4m) and State tax revenue (£3.2m.). In the same period Governmental expenditure, other than debt charges, rose by £11.7m. to £127.7m.

Revenue from the State railways and bus services fell by £2.1m. in the 1961-62 period, but their expenditure rose by £1.5m. Gross loan expenditure of £49.7m. was £6.0m. more than in 1960-61.

SYDNEY STOCK EXCHANGE

44.

After a decline in March 1962 share prices in Sydney steadied in April, when the average of the Sydney Stock Exchange's industrial series (321) was 3 percent. less than in March and the lowest so far this year. This was followed by a small recovery in the second week of May which raised the index about one percent. above the April average.

RETAIL SALES - Large Sydney Stores

Comparing 1962 with 1961 the value of sales in large city stores increased in April by an estimated 6 percent. as against decreases of 3.1 and 3.8 percent. in the two preceding months. However, it should be noted that Easter fell earlier last year (when April had an additional trading day), and that the 1961 figure represented a sharp decline of 6.9 percent. on 1960 which was not fully recovered in 1962. Sales for the first four months of 1962 were about the same as in the corresponding period of 1961 and 2 percent. less than in 1960. The value of stock held by retail stores was about 2 percent. less than a year earlier in December quarter and January/February 1961/2 and 4.8 percent. less in March.

PART III : RURAL INDUSTRIES

THE SEASON - New South Wales (See also graph p. 47)

During April 1962 inland areas of the State mostly received rainfall of up to 2 in. This was rather below average, and seasonal conditions for pastures, stock and preparations of crops were not as favourable as in earlier months. By contrast rain on the coast in April and the middle of May was excessive and pastures were damaged by local floods in North and Central Coast areas.

RAINFALL INDEX - New South Wales "Normal Rainfall" for each period = 100

DAIRYING - New South Wales

Wholemilk production in New South Wales was maintained at relatively high levels in March quarter 1962, and the total for the nine months ended March, 284m. gall., was 13 percent. higher than in the corresponding period of 1960-61, and near the post-war record for the period of 286m. gall. in 1959-60. Factory butter production which had declined from 80m. lbs. in July-March 1959-60 to 62m. lbs. in 1960-61 rose to 77m. lbs. in 1961-62, and milk intake for cheese, other processing and liquid distribution continued to increase in the 1961-62 period.

W O O L (See also graph p. 47)

Wool deliveries into the Sydney, Newcastle and Goulburn stores of 1.4m. bales in the first ten months of 1961-62 were about the same as in that period of 1960-61 but less than in some earlier seasons. Usually about 90 percent or more of the season's total is in store by the end of April.

FIRST-HAND DELIVERIES OF WOOL, Sydney, Newcastle and Goulburn Stores, 000 bales

	1956-57	1957-58	1958-59	1959-60	1960-61	1961-62
July to April	1,547	1,305	1,471	1,570	1,388	1,392
Percent of Year's Total	92%	93%	90%	92%	89%	

Sales have proceeded normally, and at the end of April, 1962, the quantity in store, 146,000 bales, was rather less than at this time of recent years. The average price realised in the ten months rose from 52d. in 1960-61 to 55½d. in 1961-62, and sales proceeds from £83m. to £93m. (£106m. in July-April, 1959-60).

RECEIPTS AND DISPOSAL OF WOOL - New South Wales Stores (Excluding Albury)

	<u>Value of Sales - £million</u>					
July - April	83.6	106.4	83.1	60.8	31.7	92.5

Deliveries of wool into store in the ten months ended April were greater in 1961-62 than 1960-61 in all States except New South Wales and Queensland, and the total for Australia increased by 126,000 bales to 4.68m. bales which was surpassed only in that period of 1959-60 (4.75m.) when the average weight per bale was less. Increased volume of sales, together with a rise in average realisation from 52d to 55d per lb. greasy, raised proceeds for the ten months from £250m. in 1960-61 to £283m. in 1961-62 but still left them 16m. less than in this period of 1959-60.

WOOL - AUSTRALIA - Ten Months ended April

		1957	1959	1960	1961	1962

Average Value per lb. of greasy wool		8ld.	48d.	59d.	52d.	55d.

Strong demand by Japan and other principal buying countries during March and the first half of April brought wool prices to the highest level for the current season. After Easter, prices eased a little but recovered again at sales held early in May. The average price, on a full-clip basis, advanced from 52d. per lb. greasy at the end of 1961 to 55d. in February and 56d. in March and April; this is equal to the closing level of the 1960-61 season and 9 percent. above the average for that season. The recent price recovery was particularly marked for the finer types of wool. In the second week of May, 1962, combing wools with counts of 64 and over were quoted about 5 percent. dearer than in the closing week of the 1960-61 season, 60's were about the same but coarser combing as well as carding types were up to 12 percent cheaper.

WOOL PRICE - N.S.W. = Pence per lb. greasy - (Average Price that would be realised if whole clip were sold at price level of month shown)
